At the time, the pro-Mursi protesters, in defiance of the military-backed government, sought to make their way to Tahrir, which was the epicentre of a popular revolt that toppled Mursi’s predecessor Hosni Mubarak in early 2011.

Although respecting the privacy and confidentiality of patients is critical to their treatment, family members do have the right to ask treating physicians and therapists for information about mood disorders, its treatment and how they can learn more.

Iole writes that White was “exasperated” to learn over the weekend that Sonnen had tested positive and Big DW sounds downright at-his-wits-end when he moans: “What else do I do?” during the article.
